

HAVE YOU RECEIVED A LETTER FROM YOUR LOCAL COUNCIL OR FAIR TRADING TASKFORCE ABOUT CLADDING?

PD REMEDIAL CAN HELP?

We can assist owners throughout the whole project lifecycle from identification through to delivery, you will have one point of contact.

Our summarised capabilities are:

1. CLADDING IDENTIFICATION

We can identify the type of cladding on the building. We can prepare the registration report to be submitted to NSW Government.

2. TOTAL SOLUTION

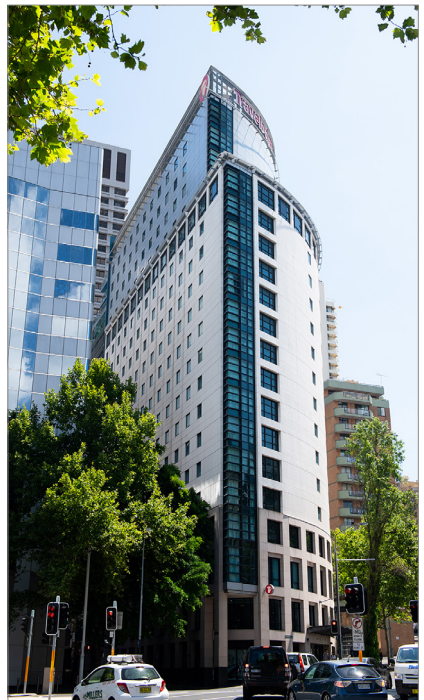

If the cladding is found to be combustible, we are able to provide a scope of works and design services to re-clad the building with non-combustible cladding that meets all relevant standards and codes.

3. AUTHORITY APPROVALS

We have decades of experience applying for and obtaining DA's and CDC's and are able to undertake this process on behalf of the owners.

4. DELIVERY

PD Remedial, part of the Paynter Dixon Group, have a history of over 100 years in delivering successful projects. We have completed numerous re-cladding projects for safety conscious owners.

Contact Tim Kurniadi for an obligation free discussion:
